

65 years
of providing
Customer Solutions

UTEX INDUSTRIES, INC.

Est. 1797

UTEX INDUSTRIES, INC.

UTEX Industries, Inc. was founded in 1940 as Universal Packing and Gasket Co. In its early years, Universal supplied packing and gaskets to the local Houston industry. In the late 1940's, the company became more involved in the oil and gas industry and received its first patent in 1948. Since that time, UTEX has proven to be a leader in fluid sealing technology and now has over 35 patented products in the field of non-metallic materials and other associated fields.

Since its inception in 1940, UTEX has grown into a world-renowned corporation consisting of five divisions. Although its corporate headquarters are located in Houston, Texas, UTEX serves numerous industries in over 50 countries worldwide. UTEX has grown from being a distributor of cut gaskets and packing to being a manufacturer of a complete and diverse range of fluid sealing products, ranging from a simple gasket to a highly engineered gas-buffered mechanical face seal. UTEX not only offers seals that operate at ambient conditions, but also complete sealing systems that can withstand extreme temperatures and pressures up to 40,000 psi. The diversity of UTEX products ranges from a tiny o-ring to a custom molded rubber part weighing over a thousand pounds.

With over 65 years of experience, UTEX has earned the reputation of being a global leader in fluid sealing technology and can provide innovative, reliable, value-added products and services specific to your needs no matter how unique or extreme the conditions.

Molded Capabilities

- Lip Seals, Multiple Lip Packings
- Custom, High-Performance Molded Elastomers, Plastics & Polyurethanes
- ChemTex® Perfluoroelastomers
- Homogeneous & Composite Rubber Products
- Plunger Packings
- Piston Seals
- Rod Packings
- Injection Molded Thermoplastics

Engineered Plastics/ High Tech Materials

- TexTech™ Composite Plastics
- Powder-Formed Plastics
- PEEK
- PPS
- PES
- UHMWPE
- Polyamide
- Polysulfone
- PTFE

Specialty Sealing Products

- Spring-Energized Polymeric Seals: Cantilever, Helical, Offset-Coil
- Engineered Seal Assemblies
- RTJ Metal Gaskets

Mechanical Seals

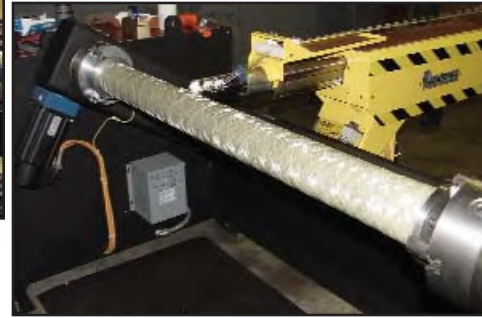

- Single-Spring
- Multi-Spring
- Outside Mounted
- Single Cartridge
- Double Tandem Cartridge
- Metal Bellows
- Non-Metallic Cartridge
- Dual Coaxial Gas Seal
- Split Face Seal
- High Performance Engineered Seals

X-TendaSeal® Services

- Repair & Replacement of all Major Brands of Mechanical Seals

INNOVATIVE SOLUTIONS

UTEX INDUSTRIES, INC.

has been providing innovative solutions for our customers for over sixty-five years. We continue to build our future by listening to our customers, understanding their needs, then developing technologies and processes to meet their requirements. Today, Utex has a stronger base to build on than ever before. Our technologies are second to none. We intend to meet our objective of becoming the preferred supplier in the markets we serve by leveraging all of our resources:

APPLICATION & DESIGN ENGINEERING

Utex offers extensive experience in high-performance materials for seals, bearings, and molded and machined component applications. Our knowledgeable engineering design team offers solutions specific to customer requirements no matter how unique or extreme the conditions.

EXCELLENCE IN MATERIALS

Utex has evolved into a vertically integrated, diversified manufacturer of high-performance elastomers, fluoroplastics and other engineered non-metallic materials.

RESEARCH AND DEVELOPMENT

Utex provides ongoing in-house development and testing of materials, processes and products to ensure the highest level of product performance. Utex continuously innovates to develop new technologies and products for the markets we serve.

QUALITY

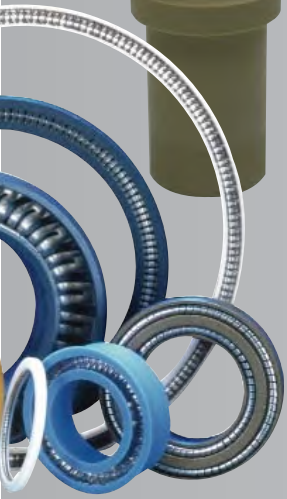

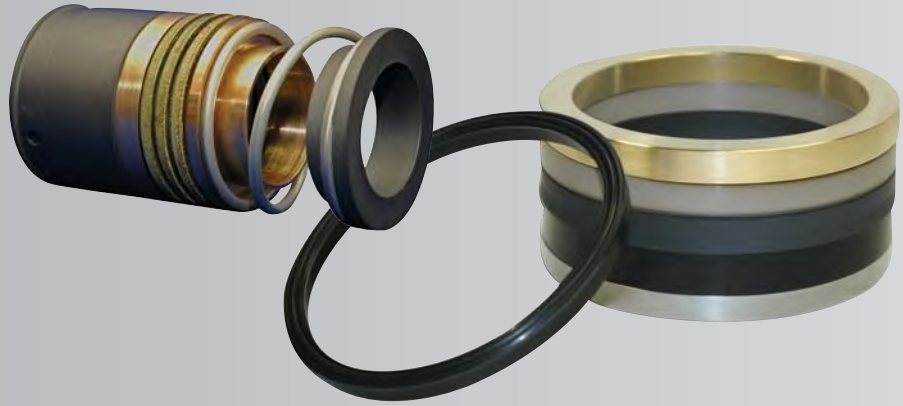

Utex is ISO 9001:2000 Certified. Quality assurance and continuous improvement begin with raw materials and last through the manufacturing processes to the finished part.

CUSTOMER SUPPORT

Utex works closely with our customers to provide a rapid response for prototypes on new applications as well as product value analysis on existing applications. Our Customer Support Team is dedicated to providing quick turnaround time from component quotations through production order delivery. We strive to exceed customer expectations.

UTEX Industries

ries, Inc.

Compression Packing

- Graphite
- PTFE
- Graphite/PTFE Composites
- Aramid
- Spun Aramid
- Flax
- Carbon
- Metallic
- Synthetic
- Special Tape
- High-Temperature Jacketed
- Technical Specialties

Injectable Pump & Valve Sealant

- U-PAK® Injectable Packing: General Service, SuperGold®, High-Performance, Extreme Service, FDA Approved Compounds, NSF® Approved Compounds, High-Strength Abrasion Resistant, Chemical Resistant

Sheet Packing

- General Service
- Homogeneous Rubber
- Diaphragm
- PTFE
- Texfoil™
- Cork
- Glass

Gasket Tape & Joint Sealant

- Thermex™ - Pressure Sensitive Adhesive Backing

Complimentary Products

- Packing Tools
- Gasket Cutting Kits
- PTFE Thread Tape
- Vulcanizing Presses
